Core Skills: Data Analytics, Data Visualization, Database Management, ETL, Advanced Excel, Digital Marketing, Generative AI

WORK EXPERIENCE

Data and Marketing Assistant | Living on Earth, Boston, MA **Feb 2023 - Present**

- Streamlined **audience retention analysis** by building a **SQL pipeline** to process multi-source data and **AI-assisted trend analysis** to identify engagement patterns and deliver automated weekly insights that contributed to **25% audience growth**.
- Improved fundraising operations by developing **ETL workflows** to integrate Excel and Little Green Light donor records into **Power BI dashboards**, reducing manual data reconciliation and **improving workflow efficiency by 30%.**
- Strengthened **donor segmentation** by analyzing contribution patterns among the **top 500 donors**, identifying high-value segments and engagement opportunities to support targeted fundraising campaigns.
- Built an **AI-powered tool** to automate updates, flag blockers, improve **Agile** workflows, and cross-functional collaboration.

Marketing Analyst Intern | Solomon Consulting Group, Boston, MA **June 2025 - Aug 2025**

- Collaborated with stakeholders to define **market research objectives, adoption KPIs, and survey requirements**, designing a structured framework to assess consumer interest in the E3 Energy-Saving Portal
- Resolved limited visibility into customer adoption by developing **executive-facing Tableau dashboards**, analyzing demographic KPIs, and identifying **30% high-adoption customer segments** to guide targeted marketing decisions.
- Evaluated **product-market fit** by analyzing survey findings from 200+ respondents using SQL and forecasting adoption trends, delivering data-driven recommendations that supported leadership's E3 Portal launch decision.

Data Analyst Intern | GVM Global, India **Jun 2021 - July 2022**

- Addressed inefficient marketing spending by analyzing **10+ campaigns** using **advanced Excel** (PivotTables, Lookups, INDEX/MATCH), identifying performance gaps that improved campaign ROI by 20%.
- Developed interactive dashboards to improve campaign tracking and identify recurring customer issues, enhancing **operational efficiency by 35%** and supporting **customer retention and churn reduction**.

ACADEMIC PROJECTS

FridgeOS | Food Inventory & Meal Planning System
Developed an **AI-powered application** using **Python, Computer Vision, and LLM APIs** to address household food waste by tracking groceries, automatically updating inventory after meal prep, and recommending recipes before ingredients expire.

Curia: Legislative Data & Insights Mobile App (Excel, Power BI)
Supported the development of **Curia, a mobile app simplifying access to legislative information and bill tracking**, by analyzing **100+ user surveys with Excel and Power BI** to identify needs and prioritize features for improved civic engagement.

Tech Trove (HTML, JavaScript, CSS)
Built a **responsive web marketplace** for refurbished gadgets using **HTML, CSS, and JavaScript**, optimizing navigation, accessibility, and cross-device compatibility to deliver a seamless user experience and support sustainable technology resale.

Trek Buddy (MySQL, Excel)
Developed a **relational database management system** in **MySQL** to automate trail reservations, manage user records, and optimize resource allocation, improving operational efficiency through structured database design and SQL-based data retrieval.
